Features & Benefits

Blade Trailer

1. 22.5 Tires; Better floatation, longer tire life, easier accessibility, less replacement cost, more stable in off road conditions.
2. 16.5 brake drums; more braking power, longer brake life, easier maintenance, less replacement cost on brakes.
3. Adjustable pin on gooseneck; adaptable to various king pin heights, help level load on trailer, will detach for easier repair, adaptable for future changes in the hauling industries.
4. Rolling beams; The beams slide in and out w/o a forklift, greatly reduces down time and keeps it a one man operation.
5. Beam Shims; can be added w/o a forklift to increase or decrease camber
6. Deck Height; low rear deck height greatly increases the versatility of unit for hauling pipe, bridge beams and poles.
7. Low tare weight; increases load weight carrying capacity and fuel efficiency.
8. Wireless remote pony motor; can be started from the pilot car.
9. Fully enclosed Honda Engine; engine is protected from the elements, rain snow, ice, etc.
10. Sealed Turntable Bearings; bearings are sealed for less maintenance from contamination also, less greasing is required.
11. Large Tool Box; room for hauling essentials and a optional second tool box
